Did the Scarecrow in The Wizard Of OZ want a brain?

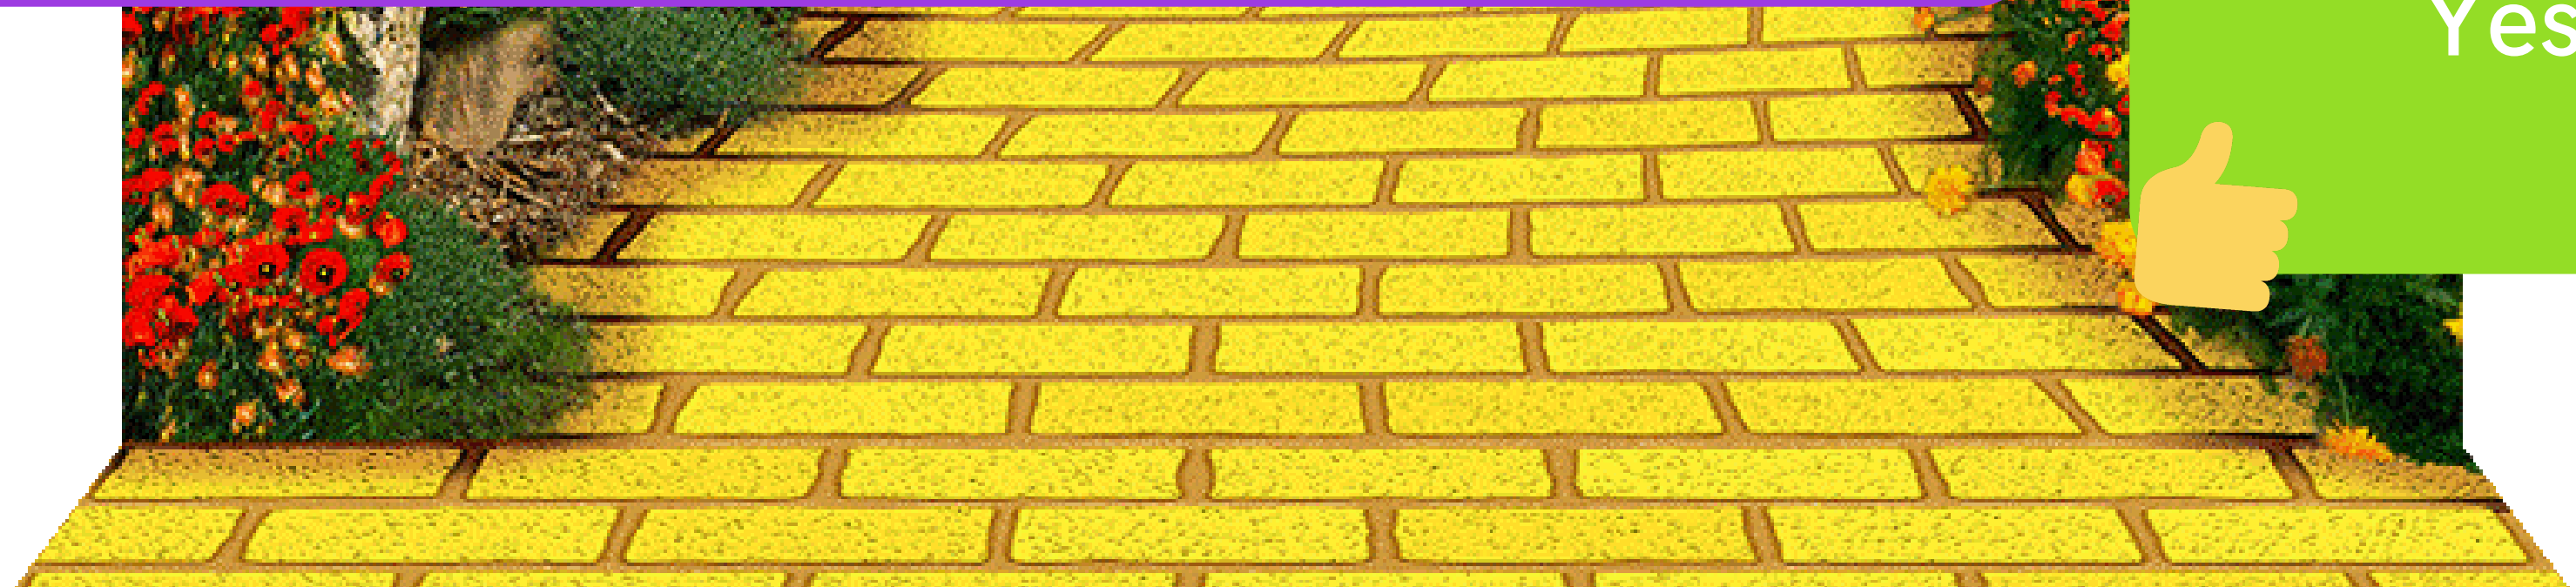

Yes

No

When the Wizard finally gives him a "brain" (which is just some pins and needles mixed with bran) the Scarecrow gains the confidence he needs to feel good about himself. But the smart thoughts? Those he's had all along. Just like with Dorothy, the Scarecrow's journey as a character is not about change or growth. As he traveled, the Scarecrow didn't gain something new. He just had the opportunity to use intelligence he already possessed—and, of course, to discover that he possessed it.
